SKILLS

Backend: Nodejs, HapiJs, ExpressJs, Git, Linux, PostgreSQL, Oracle
Frontend: Angular, React, Tailwindcss, NG-Zorro, Material UI, CSS, Bootstrap
Reporting: Jasper

WORKING EXPERIENCE

Software Engineer | Sep 2023- Present

Celloscope Ltd.

Project: Staff Information Bureau (SIB)

- Assisted in preparing for a production launch aimed at 1 million+ users across MFIs.
- Developed RESTful backend APIs using Node.js with Hapi.js, ensuring secure and scalable endpoints.
- Contributed to frontend development using Angular 16, NG-ZORRO and Tailwind CSS, improving UI responsiveness and usability.
- Implemented role-based access control for different user types, including MFI, MRA, and Staff.
- Integrated the system with Oracle database and ensured optimal data handling.
- **Project Link:** https://sib.mra.gov.bd

Project: Integrated Microfinance Solution (IMS)

- Developed RESTful APIs using Node.js (Hapi.js) to handle secure and scalable backend logic.
- Built and integrated key modules such as Member Management and Samity Management, ensuring efficient data handling and user-friendly flows.
- Implemented Dynamic Role-Based Access Control to manage user permissions flexibly and securely.
- Contributed to the frontend development using Angular 18 and NG-ZORRO, ensuring a responsive and modern user experience.
- Utilized PostgreSQL for reliable data storage, query optimization, and transaction handling.

Project: Univerge - A Billing Solution

- Built and deployed a scalable billing system used by Tele-Exchange and CrossWorld clients.
- Implemented secure login systems and executive dashboards for revenue and call tracking.
- Developed rerating, failed call management, monthly reporting, and automated billing.
- Used Node.js, Angular 16, Material UI, and Oracle for seamless integration.
